

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for the City of Hillsdale BPU

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During April 1, 2022 to April 30, 2022, due to an independent lab failing to analyze the samples within the hold time, we cannot be sure of the quality of your drinking water during that time.

What should I do? There is nothing you need to do at this time. This is not an emergency. You do not need to boil water or use an alternative source of water at this time. Even though this is not an emergency, as our customers, you have a right to know what happened and what we are doing to correct the situation.

The table below lists the contaminants we did not properly test for, how often we are supposed to sample for these contaminants, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the dates we will collect follow-up samples.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been analyzed	Date samples will be collected
TTHM	1 sample every 3 months	1	April 1, 2022 – April 30, 2022	July 1, 2022 – July 31, 2022

What happened? What is being done? We collected the required sample and sent it to an independent laboratory for analysis. Due to a lab error, the sample was not tested within the allowable hold time. We are making every effort to assure this does not happen again. We will be collecting follow-up samples in July 2022.
