Fee: \$70.00
Registration Deadline: April 5, 2024
Games Start June, 2024 TBA
Games Played Tuesdays and Fridays
Practice Times Set by Coaches

For season updates and cancellations find us on **Facebook** and listen to **WCSR**.

Player's Name: _____ Age (as of Jan. 1, 2024) _____

Address: _____ City/Zip: _____

E-mail Address: _____

Shirt Size: _____ Pant Size: _____
(Youth and Adult Sizes Available)

Parent(s): _____

Home #: _____ Cell #: _____ Work #: _____

Emergency Contact: _____ Phone #: _____

WAIVER: I, the undersigned, hereby agree to release the City of Hillsdale and their staff, coaches and other volunteers of all claims of damages, demands, or actions whatsoever in any matter arising from my child's participation in this program. I also understand that at any time I may be asked and must provide proof of my child's age. I clearly understand that if I cannot provide proof of my child's age in a timely manner, he or she will be suspended from play until I do so. Photographs may be taken at certain Recreation Department activities, and, unless the department receives signed, written objections, photos may be reproduced for publication.

Parent's Signature: _____ Date: _____

Are you willing to be a volunteer coach? _____

(Make Checks Payable to: Hillsdale Recreation Department)

CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless, or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

1. If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play.
2. Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, and playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.
3. Remember: Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. They can even be fatal.
